Hiring Manager
S.P. Madrid & Associates
17th Floor, Chatham House
Valero corner V.A. Rufino Street
Makati City, Metro Manila 1226
Philippines

Dear Hiring Manager,

I am writing to express my interest in the IT Support Intern position at S.P. Madrid & Associates. I am currently a first-year Bachelor of Science in Information Technology student at PHINMA Araullo University – South. I want to gain practical experience, improve my technical skills, and learn more about working in a professional IT environment.

As a first-year BSIT student, I am still learning and building my technical skills through my classes and school projects. One of the projects I participated in was the School Clinic Health Monitoring System (SCHMS). In this project, I worked with my team in planning and documenting the system, identifying problems in the school's manual clinic record process, and collaborating during the project's development. This experience helped me improve my teamwork, communication, and problem-solving skills.

I am willing to learn, work hard, and adapt to new challenges. I hope to contribute to your organization while continuing to improve my knowledge and skills in Information Technology.

Thank you for considering my application. I would appreciate the opportunity to discuss how I can contribute to your team while gaining valuable experience. I look forward to hearing from you.

Sincerely,
Trisha Anne B. Lucas

Evidence of Opportunity Used as the Basis:

The advertisement features a blue header with the text "MADRID PHILIPPINES CAREERS" and a small logo. Below this, the main headline reads "WE ARE LOOKING FOR Student Interns!" in large, bold, yellow letters with a blue outline. Underneath, it says "OPEN POSITIONS" and then "IT SUPPORT INTERN" in a blue box. The locations "Pangasinan, Davao, Makati, Quezon City and PITX Parañaque" are listed below. A paragraph of text lists eligible degrees: "Bachelor's Degree in Information Technology, Computer Science, Business Administration, Software Engineering, Data Analytics, Statistics, Mathematics or any related field." To the right, there is a photo of a smiling man with glasses, identified as "Joselle Callora Software Developer TICP Batch 1". A lightbulb icon is next to him. At the bottom left, there is a QR code and the text "SCAN QR CODE AND APPLY NOW!" along with the website "www.madridph.com".

Process & Integrity Note

While preparing for this application portfolio, I searched for several internship opportunities related to Information Technology. I compared different companies and carefully read their job postings before choosing S.P. Madrid & Associates as the basis for my resume and cover letter. I selected this opportunity because it offers an IT Support Intern position that matched the type of internship I wanted to apply for.

Before using the job posting, I checked whether it came from a real company and reviewed the information provided to make sure it was appropriate for my portfolio. I also compared different companies before making my final decision.

I used AI as a guide to improve the wording, organization, and grammar of my resume and cover letter. However, I reviewed every section, made changes where needed, and ensured that the final content reflected my own background, skills, and school project. I did not copy information from any generic templates.

To protect my privacy, I made sure not to share any unnecessary personal information while using AI. I also chose a clean and professional layout to make my portfolio well-organized, easy to read, and suitable for an internship application.

ITE 366 Introduction to Computing | Period 2 Checkpoint

Professional Application Portfolio

I. Checkpoint Overview

This Period 2 Checkpoint is an individual submission. You will create a professional application portfolio for a real or realistic job, internship, part-time position, or entry-level opportunity. The purpose is to apply information literacy, responsible AI use, professional digital communication, and word-processing skills in one practical output. Your work should look like something you would be willing to send to an actual employer. No oral presentation is required; the portfolio will be evaluated as submitted work.

II. Required Submission

- **Resume**-Create your own one-page resume. You decide the layout, organization, visual style, and section order. Include only truthful information that supports your target position.
- **Cover Letter**-Create your own one-page cover letter for the same position. It must be tailored to the role or organization rather than copied from a generic internet template.
- **Job/Employer Reference**-Include evidence of the opportunity used as your basis. This may be a screenshot of a job post, a company careers page, a reputable job platform listing, or another clearly identified professional source.
- **Process & Integrity Note**-Write a 150-250 word reflection explaining how you researched the opportunity, how you checked the information, and whether AI was used. Write this in your own format and voice.

III. Creative Freedom and Professional Responsibility

There is no required resume or cover-letter template for this checkpoint. You are expected to make your own design decisions. Creativity is encouraged when it improves clarity and professional presentation. A strong application document is not the one with the most colors or decorations; it is the one that presents relevant information clearly, consistently, and appropriately for the target career.

- You may use a traditional, modern, minimalist, or creative layout.
- You may use columns, section dividers, icons, subtle color, and other professional visual elements.
- A professional photo is optional; include one only if you intentionally choose to do so.
- You may organize sections differently depending on which strengths you want to emphasize.
- You may use Microsoft Word, Google Docs, Canva, or another appropriate document tool, but the final output must remain readable and professional.

IV. Module Connections

Module	Skill to Apply	Evidence in the Portfolio
Module 5 - Information Literacy	Search effectively and evaluate credibility, accuracy, bias, and currency.	Use an appropriate opportunity, check the job/employer information, and explain your verification process in the Process & Integrity Note.
Module 6 - Responsible AI Use	Use AI as support, verify output, protect privacy, and remain responsible for the final work.	If AI is used for brainstorming, grammar, wording, or feedback, review and edit it yourself and briefly disclose the use.
Module 7 - Digital Communication & Professional Presence	Apply professional tone, netiquette, and appropriate digital communication.	The cover letter, contact details, profile links, and overall communication should be suitable for an employer.
Module 8 - Word Processing & Document Formatting	Create structured documents using formatting, layout, editing, and document-management tools.	The resume and cover letter should demonstrate clean structure, consistent formatting, readability, and careful proofreading.

ITE 366 Introduction to Computing | Period 2 Checkpoint

Professional Application Portfolio

V. Resume Requirements

Create a one-page resume that is appropriate for the position you selected. There is no required section order. Choose the information and arrangement that best represent your strengths as a student or future professional.

- Name and professional contact information
- A short objective, profile, or professional summary when appropriate
- Education
- Technical skills and soft skills
- School projects, programming/IT projects, major outputs, activities, or competitions
- Volunteer work, organization involvement, training, seminars, or certifications
- Work experience, if you genuinely have any
- Portfolio, GitHub, LinkedIn, or another professional profile link when appropriate

Do not invent work experience. A student without formal employment can still create a strong resume by presenting relevant projects, responsibilities, training, skills, and achievements.

VI. Cover Letter Requirements

Your cover letter should support your resume rather than repeat it word-for-word. It should explain why you are applying, why you are interested in the role, and how your background relates to what the employer needs.

- Use a professional greeting and closing.
- Identify the specific position you are applying for.
- Show that you understand the role or organization.
- Connect your skills, education, projects, or experience to the position.
- Use specific examples instead of vague claims such as 'I am hardworking.'
- Keep the tone confident, respectful, and professional.
- Proofread names, company details, spelling, grammar, and punctuation before submission.

VII. Job/Employer Reference and Information Literacy

Your chosen job or opportunity should come from a source that can reasonably be used for a professional application. Before using the information, consider the Module 5 CABC checks: Credibility, Accuracy, Bias, and Currency. Your Process & Integrity Notes should briefly explain how you decided that the information was usable.

- Credibility-Who published the opportunity or employer information?
- Accuracy-Can important details be confirmed using the employer's official information or another reliable source?
- Bias-Is the information mainly informative, or does it make misleading or exaggerated claims?
- Currency-Is the job post or employer information current enough to use?

VIII. Responsible AI Use and Process & Integrity Note

AI may be used as a support tool, but it must not replace your own thinking, judgment, or responsibility. If you use AI, you are expected to review the output and make the final decisions yourself. Do not place passwords, government IDs, bank details, student records, home addresses, or other unnecessary sensitive information into AI tools.

- Where you found the job or employer information and why you considered the source usable
- What you did to check whether the information was current and trustworthy
- Whether you used AI; if yes, what it helped with and what you personally reviewed, revised, or verified
- How you protected your privacy and avoided sharing unnecessary sensitive information
- One writing or design decision you made to make your application more professional

IX. Submission Format

- Combine the resume, cover letter, job/employer reference, and Process & Integrity Note into one organized submission unless your instructor gives a different instruction.
- Preferred final format: PDF, so the layout remains consistent across devices.
- The original editable file may also be requested for checking.
- Suggested file name: Lastname_Firstname_P2Checkpoint.pdf
- This is an individual submission and no oral presentation is required.

X. Professional Quality Standards

- Information must be truthful, relevant, and appropriate for the target role.
- Design must support readability and professionalism.
- Fonts, spacing, alignment, headings, and visual choices should be consistent.
- Grammar and spelling must be checked.
- The cover letter must be tailored rather than copied from a generic template.
- AI-assisted content must be reviewed and edited by the student before submission.
- Do not include passwords, government IDs, bank details, or unnecessary sensitive personal information.

XI. Grading Rubric - 100 Points

Criteria	Description	Points
Resume Content & Relevance	Clear, truthful, and tailored content. Strong use of education, skills, projects, experience, and achievements appropriate to the selected role.	25
Resume Design & Readability	Original organization, professional visual choices, clear hierarchy, consistency, spacing, alignment, and readability.	15
Cover Letter Quality	Specific to the selected position, professional tone, strong structure, and a clear connection between the student and the role.	25
Information Literacy	Appropriate job/employer source and evidence that credibility, accuracy, bias, and currency were considered.	10
Responsible AI & Integrity	Honest disclosure when applicable, meaningful human review, privacy awareness, verification, and responsibility for the final submission.	10
Digital Professionalism	Professional language, appropriate contact/profile information, and communication suitable for an employer.	5
Overall Polish & Creativity	Thoughtful presentation, originality, proofreading, consistency, and a complete submission that feels ready for a real application.	10
